Exquisite Candles

<http://www.crawfordmarket.in>

Beeswax has many beneficial properties. Used in candles, it:

- * Cleans and improves the air by eliminating odors, smoke, viruses, mold, dust, and other allergens
- * Improves sleep and concentration and balances mood to create a sense of well-being
- * Acts as a natural detoxifier; improves and enhances the immune system
- * Is approved 100% pure for sacred and religious use in aiding body and mind, healing, purifying and cleansing
- * Burns brighter, hotter, cleaner and longer than chemical (paraffin) waxes.
- * Is smokeless and virtually dripleless with no soot
- * Is a great renewable resource

Benefits of the oils we use:

* Clove:

The health benefits of clove oil can be attributed to its antimicrobial, antifungal, antiseptic, antiviral, aphrodisiac and stimulating properties. The oil is used for treating a variety of health disorders including toothaches, indigestion, cough, asthma, headache, stress and blood impurities.

* Cinnamon:

The health benefits of cinnamon oil are, great as a mosquito repellent. Anti stress agent and is a very effective stimulant.

* Lemongrass:

The health benefits of Lemongrass Essential Oil can be attributed to its properties like analgesic, anti depressant, anti microbial, anti pyretic, anti septic, astringent, bactericidal, carminative, deodorant, diuretic, febrifuge, fungicidal, galactagogue, insecticidal, nervine, sedative and tonic.

* Tulsi:

The health benefits of holy basil or tulsi include oral care, relief from respiratory disorders, fever, asthma, lung disorders, heart diseases and stress.

Our Exquisite Line of candles use only natural waxes, pure essential oils and pure plant extracts. They are truly exquisite.

In contrast, traditional paraffin candles that are dyed with artificial colours and scented with chemical fragrances which include over 350 different toxins that can lead to an increased risk of cancer (per U.S. government EPA finding in 2009)
